YACHT DEHUMIDIFIER

The Zarpax Yacht-Dehumidifier offers a quick and easy way to remove dampness from your boat. The dehumidifier attracts the excess humidity in your boat like a magnet and safely retains it without leaking. This product is ideal for keeping enclosed spaces in your sailboat and yacht free of moisture and for protecting your valuable (diving) equipment, electronics, etc.. Each bag in this set holds 450g. of absorbent material, making it useful in spaces up to around 6m³.

Need to recharge it? Just heat it in the microwave

When your Yacht-Dehumidifier is full of moisture it needs recharging. It tells you this on the special indicator, which turns from blue to pink. After 10 minutes of recharging in the microwave at approx. 600 Watt, the dehumidifier will be ready for use again. During recharging, the moisture will evaporate hygienically from the product. You can also recharge the product in the sun or on top of a radiator, but this takes longer. After recharging, the indicator turns back to blue. Your Yacht-Dehumidifier will then be ready for use again.

Package content 3 PCS

PRODUCT

Product Code	LV3-B450
Weight	3x 450 g
Capacity	3x 180 cc
Box Size (set)	150 x 160 x 110 mm
